

Our vision

All our preschool activities are based on The Swedish Curriculum for the preschool (Lpfö-98/16)

Our vision is that the children at Happy Kids, by integrating culture and tradition in everyday preschool activities, can develop their language skills at an early age, can be informed about, and experience at first hand, the world's various cultures and traditions and, in so doing, can gain a natural understanding for ethical diversity and tradition.

How do we achieve that?

- We are bilingual
- We implement our teaching methods, *Start* and *Second step*
- We develop the children both within the group and as individuals
- We celebrate traditions from all over the world
- We develop the children's self-esteem with the help of competent staff
- We develop the children's sense of curiosity through our multi-cultural preschool
